

DEVELOPMENT DIALOGUE BACHELORPROGRAMME IN HEALTH SCIENCES

To guarantee the quality of the programmes at VU University Amsterdam, the programmes are assessed once every six years by a panel of external experts. The final assessment of the programme is conducted by the Dutch Flemish Accreditation Organization (NVAO). In addition to the assessment, the panel of experts conducts a discussion with the programme in which possible developments and improvements are discussed.

The bachelorprogramme in Health Sciences was reviewed in September 2018 and the final assessment is positive. During the development dialogue, the panel discussed with the programme the current developments of the discipline, including the profile of the programme and the multi/ interdisciplinary nature of the programme which consists of contributions from many different departments and faculties.
